1. If you want to edit documentation, please edit the file Qstat.R instead of Qstat.Rd.
2. After you have completed your edition, run the code below step by step

1) roxygen2::roxygenise()

2) devtools::document()   [after this step, your documentation will be updated automatically in Qstat.Rd in right format]

3) devtools::check().   [0 errors ✔ | 0 warnings ✔ | 0 notes ✔. Successful update will show this, if there are any errors or warnings, you have to change your edition of documentation. Many of these errors and warnings are related to the format of you edition]

4) devtools::build().   (It will create a file "Qstat_1.0.tar.gz", remember to push this to git if you have any update).
